- Notes****
- a Can be fed to satiation at temperatures above 8 degrees C or 50 degrees F
 - b Contains guar gum for effective removal of feces in aquaria, small ponds and tanks
 - c A lower carbohydrate food is recommended for these fish
 - d This food will leave a surface oil(fat) film within aquaria, small ponds and tanks
 - e Omnivorous and carnivorous fish species including catfish
 - f This low carb conditioning food is nutrient dense. Reduce feeding rates accordingly in cold water conditions
 - g These fish may need live food for first feeding of fry
 - h These foods are very nutrient dense and digestible-Adjust your ration sizes accordingly
 - i Recommended for fancy goldfish such as Orandas, Ranchus, Ryukins, Moors etc.

Legend

	Recommended (Can be fed as a staple food)
	Caution (Can be fed as a supplementary food)
	Stop (This food is not recommended for these fish)

* All Tropical & Koi/Goldfish foods contain Krill, Astaxanthin and/or 100% pure Spirulina for enhancement of skin colouration and overall health

^ XXXX Specific product #'s are required for these foods-please consult a current price list for correct ordering of pellet size/type and (pigmented or non-pigmented)
