(A sensible addition to your fishes' environment)

Quality & Prompt Customer Service

(Your questions answered and feedback valued)

Keeps Your Feed Fresh!

(Great for freezer storage as well)

Great Purchase Value

(High quality fish food at an excellent price)

Important Feeding Information: Our food is highly palatable and digestible. However, Koi & Goldfish will over eat if presented with an abundance of food. **Don't overfeed! This is especially important at cooler water temperatures.** Pre-soaking the food is suggested for fancy varieties of goldfish. (I.e. Orandas, Lionheads, Ranchus etc.) Adjust your feeding rate accordingly to maintain a healthy, happy fish and clean environment.

Available Sizes & Packaging:

Small Pellet (~2-3.0 mm) for fish 2" or larger: 500g (1.1lb)
