

Floating

FEATURES & BENEFITS

Ver. 06/2008

Martin's Floating Fish Feed is ideal for recreational growers or hobbyists who like to observe their fish feeding at the surface. These extruded pellets are hard and durable which eliminates fines. Rounded pellet edges and uniform fish oil application improve palatability. This diet is nutritionally complete and balanced with no need for supplementary food. A unique application process ensures stability and optimum bioavailability in pigmented rations.

Guaranteed Analysis:

Crude Protein (min)	44% Typical (45%)	Sodium (actual)	0.45%
Crude Fat (min)	10% Typical (11%)	Vitamin A (min)	6,800IU/Kg
Crude Fibre (max)	3.5%	Vitamin D3 (min)	2,100IU/Kg
Calcium (actual)	0.9%	Vitamin E (min)	320IU/Kg
Phosphorous (actual)	0.97%		

Digestibility & Other Specifications:

Digestible Protein-DP (%)	>89%	Omega-3 Fatty Acid Content	~1.8%
Digestible Energy-DE (MJ)	15.5	Omega-6 Fatty Acid Content	~0.6%
DP/DE (g/MJ)	~26	Carbohydrate Content	~24.0%
Fat From Fish Sources	>66%	Crude Ash Content	~6.0%

Ingredients: Wheat Middlings, Corn Gluten Meal, Herring Meal, Soybean Meal, Poultry Meal, Feather Meal, Herring Oil, Poultry Fat, Lysine, Vitamin Premix, Vitamin E, Choline chloride, Iodized Salt, Mineral Premix, L-ascorbyl 2-monophosphate (Source of Vitamin C).

Storage: Store in a cool dry place. For best results we recommend feeding this ration within 6 months from manufacture date.

Feeding Instructions: Feed as close to satiation level as possible to maximize growth. Monitor fish feeding behaviour closely. Overfeeding will result in poor feed efficiency, feed waste and poor water quality conditions. Recognize that fish will eat to meet their energy requirements, which is influenced by temperature. Feed one or two meals a day in moderate temperatures. Increase the feeding amount as temperatures rise but reduce feeding when excessively high temperatures are reached or when there are other constraints to feeding (i.e. low oxygen levels in the water). Our feed representative can provide you with more assistance if desired.

Available Sizes (Fish Size)

3.0mm* Regular	4.0mm Regular	5.0mm Regular or Pigmented	6.0mm Regular or Pigmented
23-40g (5-6")	40-90g (6-8")	90-250g (8"+)	250g+ (11"+)

*millimetres

Pigmentation: Pigmented rations contain 50ppm Astaxanthin

Packaging: 20Kg (44.1lb) polyethylene plastic bag (recyclable), also available in bulk
